

SUPPLEMENTAL TECHNICAL INSTRUCTIONS	Supplement Number	Date Issued
	80-3-C	4/17/80

National Mapping Division

SUBJECT

Predicted North American Datum 1983 Credit Note

BACKGROUND

Instructions for showing the predicted datum shift to the North American Datum 1983 were furnished in a CTD memorandum dated January 16, 1979. In certain instances when the datum shift is zero in either latitude or longitude on both directions, the explanatory note added to the credit legend will be modified accordingly.

INSTRUCTIONS

- Case I - Quadrangles where the shift is in two cardinal directions -
- To place on the predicted North American Datum 1983 move the projection lines X meters north/south and X meters east/west as shown by dashed corner ticks
- Case II - Quadrangles where the shift is in one cardinal direction only -
- To place on the predicted North American Datum 1983 move the projection lines X meters direction as shown by dashed corner ticks
- Case III - Quadrangles where no shift is required -
- No adjustment is necessary to place this map on the predicted North American Datum 1983

On maps smaller than 1:25,000 scale the datum shift is not symbolized and the phrase "as shown by the dashed corner tick" is deleted from the above notes.

APPLIES TO

New and revised maps and reprints that require cartographic modifications other than changing the plant imprint note.

ISSUED TO

EMC, MCMC, RMMC, WMC
